DETAILED ACTION

1. **Claims 1-21** have been examined.
2. Priority benefit claimed under Title 35, United States Code, § 119 (e) have been acknowledged.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-21 provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-25 of copending Application No. 09/223,765. Although the conflicting claims are not identical, they are not patentably distinct from each other because claims 1-21 of this application have the added feature of a "initialization function" and "user request mapping", however the instant claim 1 is obvious from claim 1

Art Unit: 2132

of copending Application No. 09/223,765 since the implementation of the method of copending Application No. 09/223,765 requires an initialization function at the server and verification process by mapping user request and therefore it would have been obvious to include "initialization function" and "user request mapping" in order to implement the claimed method.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
